Summary

Enthusiastic and dedicated beginner app developer with experience in developing Android applications using Java and Android Studio. I have demonstrated app development skills through various extracurricular activities. I work hard to develop high-quality applications and am eager to learn more about new technologies with your guidance. My goal is to contribute to our club's recognition in the app development domain. I am committed to continuous improvement and strive to become a proficient programmer.

Project

Absentees App

Developer

[Repository Link](#)

- Developed an attendance tracking application using Java and Android Studio.
- Ensured the app saves the last open activity and preserves data when closed or cleared from recent apps.
- Integrated functionality to save the last saved data even if the app is cleared from the recent apps list.

AniLog App

Developer

[Repository Link](#)

- Developed a Watched Anime List Tracker application using Flutter for cross-platform compatibility.
- Used SharedPreferences for local data storage to persist user data without requiring a login page.
- Integrated add, remove and search functionality to quickly find and manage watched anime.
